

Targeted Hearing Screening Project

What is the Targeted Hearing Screening Project?

The project is an initiative to improve hearing screening access for children in the community and will run until June 2020.

Who does it cover?

The initiative offers free hearing screening for children and young people aged from nine months to 16 years, who hold a current Medicare card. It is performed by an allied health assistant under the supervision of a senior audiologist.

Where is it based?

- Logan Central Community Health Centre, Level 1, 97-103 Cnr Wembley and Ewing Roads, Logan Central Qld 4114.
- Inala Community Health Centre, 64 Wirraway Parade Rds, Inala Qld 4077.
- Caboolture Square, Level 5, 60-78 King Street, Caboolture Qld 4510.

How do I make an appointment?

Parents can make an appointment if they are concerned about their child's:

- Speech and language development.
- Pronunciation or speech clarity.
- Hearing loss, raised by professionals working with your child (e.g. teacher, family doctor, or childcare educator)
- Learning or behavioural development, which may be related to hearing loss.

What's next after our appointment?

Following the appointment, you will be given a report outlining the results of the hearing screen and any recommendations for further follow-up, if necessary.

Updated: June 2019
