Refugee Health: Chronic Disease Management and Prevention

Wednesday 1st August 2018
6:30 to 8:45pm
Interactive Webinar
(Live education at PACE/UQ School of Pharmacy, Woolloongabba)

This dynamic educational session is designed for primary care health professionals working with people of refugee background.

An interactive case study will be presented with clinicians and the community problem-solving to identify the delivery of best practice care while acknowledging the constraints of General Practice.

Speakers:
- Dr Karam Kostner, Director of Cardiology, Mater Hospital Cardiologist, Refugee and Asylum Seeker Cardiovascular Clinic, Mater
- Dr Margaret Kay, GP and Multicultural Health Clinical Lead, Brisbane South PHN
- Meryl Jones, Nurse Unit Manager, Mater Refugee Health Services
- Members from the Brisbane Refugee Health Advisory Group

Learning Outcomes:
- Discuss considerations related to caring for patients from a refugee background with or at risk of chronic disease
- Describe the process for the effective delivery of preventive health care to patients when there is cultural and/or linguistic difference.
- Critically analyse how the refugee experience can impact the quality of chronic disease management in primary care.
- Identify key resources and services available to support patients and families from refugee backgrounds with or at risk of chronic disease
- Explain the principles that underpin the delivery of culturally safe care.

To participate in this video conference register at info@refugeehealthnetworkqld.org.au by COB 27th July 2018.
