Resources to support Practices

- [Refugee Health Assessment Template](#)
- [Refugee Ready Checklist for practices](#) - A quick-reference guide to General Practices considering providing health care services to people from a refugee background.
- [Translated Appointment Reminder Tool](#) - assists health services with sending translated messages (including SMS) to patients in 64 languages with 15 appointment types.
- [Free Interpreting Service](#): Doctors Priority Line [1300 131 450](tel:1300131450)
- [Refugee Health Network Queensland](#)

Supporting arrivals without Medicare

People seeking asylum in Australia who are not eligible for a Medicare Card can access public hospitals in Queensland free of charge under the [Qld Health Directive](#). This may include people arriving from [Ukraine](#).

Some people arriving from Ukraine are also eligible to be supported through Australia's Humanitarian Settlement Program (HSP).

The HSP is able to access funds for GP consults, pathology, imaging and medicines to support necessary health care while patients are awaiting Medicare. Contact the Brisbane settlement service [Multicultural Australia](#) for support.

Other less urgent care (including comprehensive refugee health assessment or routine care) needs to be postponed until Medicare is available.
